

**Title**

**Urology in men under 40: what every GP should know.**

**Overview**

A practical webinar for general practitioners presented by Dr Deanne Soares, Urological Surgeon.

Urological symptoms in younger men can be common, anxiety-provoking, and often misunderstood. This webinar provides a clear, practical framework for assessment, investigation, and referral in primary care.

This session will cover:

- Approach to testicular lumps and scrotal pain.
- Haematuria in younger men – when it matters.
- Haemospermia – reassurance, investigation, and when it’s not benign.
- Chronic prostatitis / chronic pelvic pain syndrome / urethritis.
- Early erectile dysfunction – organic vs psychogenic causes.
- Which investigations are actually useful.
- When to refer to a urologist.

**Learning Outcomes**

By the end of this activity, participants will be able to:

1. Identify serious pathology in younger men requiring urgent referral.
2. Confidently manage common benign presentations.
3. Recognise when to avoid unnecessary imaging and investigations.
4. Explain when specialist referral improves outcomes.

**RACGP**

One CPD Educational Activity hour.

**Registration**

[Register online here](#) for this virtual event or scan the QR code to register.

- First name and last name
- Practice name, suburb and postcode
- Email address (to which your individual registration confirmation and Zoom link will be sent)
- RACGP number (if applicable)
- Occupation

You will receive email confirmation and a link to join the Zoom meeting. Please check your Junk or Spam if you don’t receive it in your Inbox.
